Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

1. The subject matter of claim 1 is unclear (PCT Article 6), since the phrase "the majority" is not clear.

The applicant could overcome this objection by replacing this phrase with a percentage (50, 60, 70) taken from page 35, lines 26-30 of the description.

Claims 14 and 19 are unclear for the same reason (PCT Article 6).

- 2a. The subject matter of claim 1 is unclear (PCT Article 6), since isocyanate groups are also isocyanate-reactive functional groups (e.g. isocyanurate formation) and therefore the mixture is not free from isocyanate-reactive functional groups.

The applicant could incorporate claim 11 into claim 1 in order to overcome this objection.

- 2b. According to page 10, lines 26-30 of the description, component (II) and the claimed mixture is an aqueous, organic dispersion. Since water contains isocyanate-reactive functional groups, the subject matter of claim 1 is unclear (PCT Article 6).

Box No. VIII Certain observations on the international application

Claims 14 and 19 are unclear for the same reasons (PCT Article 6).

3. The subject matter of claim 14 is unclear (PCT Article 6), since the term "prevailing amount" is unclear.

The applicant could overcome this objection by replacing the term with the information provided on page 13, line 25 (more than 50 wt.%).

Claim 19 is unclear for the same reason (PCT Article 6).

4. The subject matter of claims 1, 13, 14, 19 and 21 is unclear (PCT Article 6), since the examples are not covered by the claims. The cross-linking agent component II contains Irgacure® 184 (1-hydroxycyclohexyl-phenyl-ketone). This component is therefore not free from isocyanate-reactive functional groups.
